

MM/DD/YYYY

Statement regarding Exemption from Flu Vaccine

My religious beliefs endorse treating the body as a temple of the Holy Spirit.

I do not inject myself with drugs or chemicals.

In good conscience, a forced vaccine would be a violation of my right to exercise both religious freedom and autonomous health practices which aim to preserve health and prevent disease.

I willfully avoid consumption of the following elements which are known Influenza vaccine excipients and media:

- Hormone or antibiotic injected animal products
- Genetically modified cell lines
- Formaldehyde, a carcinogen
- Glyphosate
- Aluminum, a neurotoxin
- Mercury or other preservatives
- MSG, monosodium glutamate
- Unsourced gelatin
- Unnecessary refined sugars

I avoid willful consumption of products that are not proven to be non-carcinogenic or non-mutagenic, those which are questionably harvested in regard to ethics, or those which may actually be linked to disease.

Sincerely,

[signed]
